

(Type 2 tool head, other end tapped , w/ single hand stop grip)

# THE STIFFY SNARE TOOL™

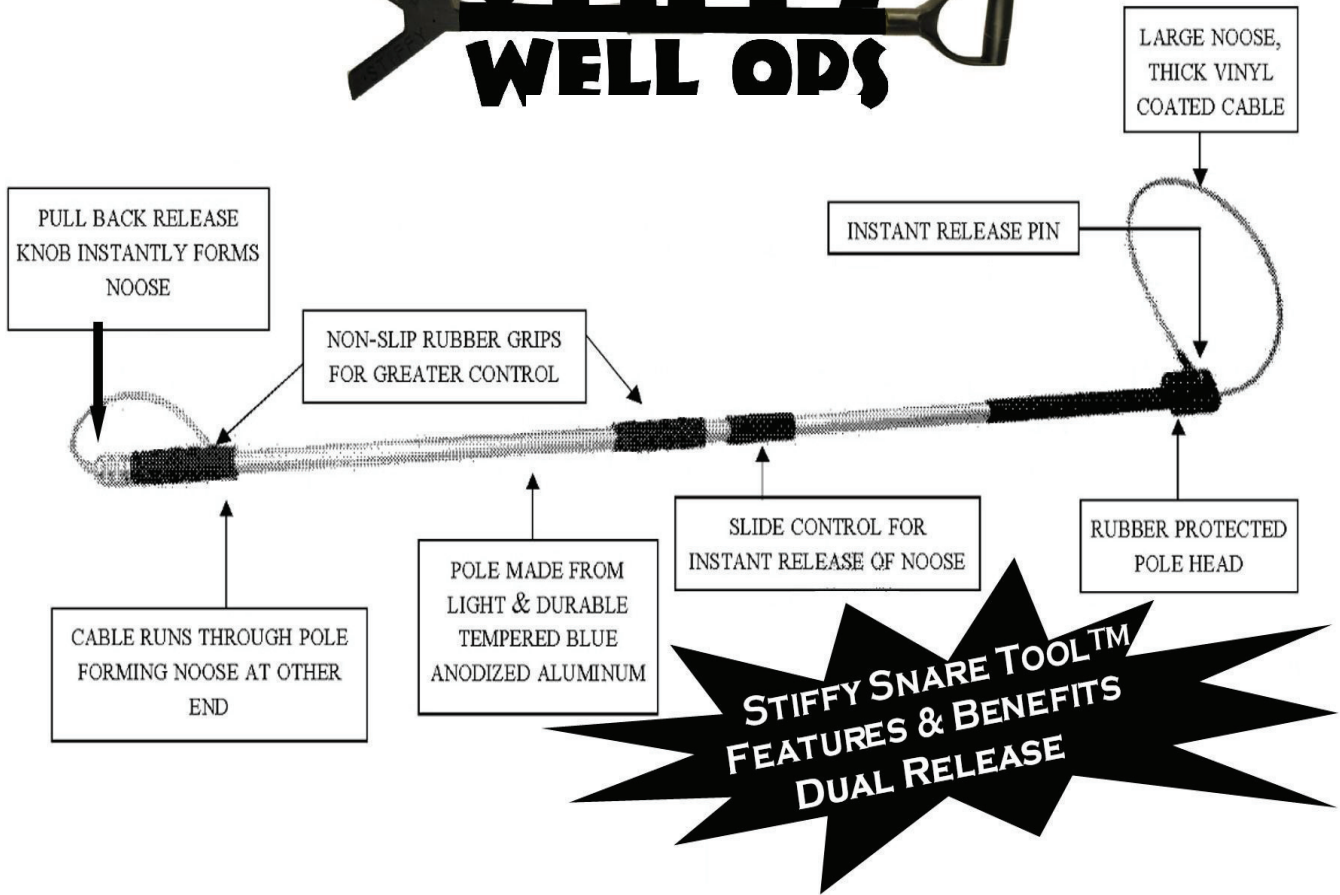

## Aluminum and Stainless Steel Snare Poles

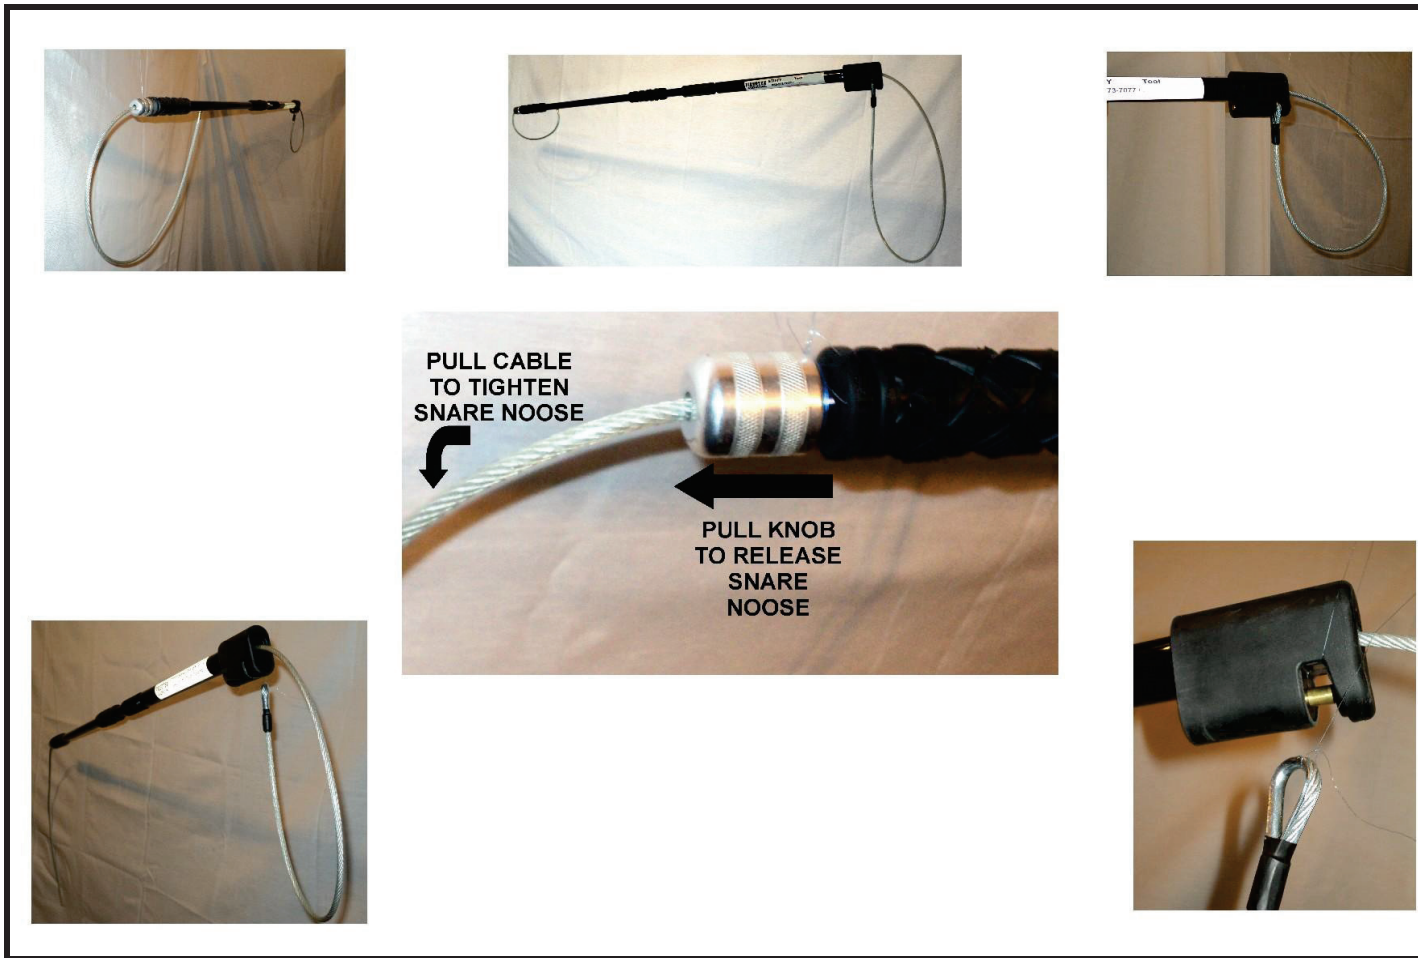

Cousin to the wildly popular **STIFFY HAND TOOL™**, the **STIFFY SNARE TOOL** continues to set the bar in assisting operators in providing safer working conditions. After years of extensive R&D, STIFFY has brought to the market the first **NEW TOOL** designed to **save fingers, hands, & arms by avoiding pinch points & crush points** allowing you to control tubular & suspended loads.

The **STIFFY SNARE TOOL** features improved non-slip grips, automatic locking mechanism and super strong aluminum or stainless steel shaft. The **Dual Release** uses a spring loaded noose release to extend the cable through the tool to release the tubular or the slide control which instantly drops the noose from the tool.

# STIFFY™ WELL OPS

STIFFY SNARE TOOL ; 36" Dual Release, ALUM SSTDR-36

STIFFY SNARE TOOL ; 48" Dual Release, ALUM SSTDR-48

STIFFY SNARE TOOL ; 60" Dual Release, ALUM SSTDR-60
